**After using Flintstone II and Mega Fast**

*"For all your refinishing supplies, equipment and training needs..."*

This one-part, fast drying waterborne multi-colour coating system has exceptional durability that can withstand many years of daily use. Each Flint-Stone II™ colour consists of a multitude of individual colour flecks, which gives the finished product an incredible richness and depth unmatched by other multi-coloured coatings available on the market today.

**Before**

**After using Flintstone II**

Most commonly used on kitchen countertops and bathroom vanities, Flint-Stone II™ has a **Beautiful, Unique Appearance** which allows you to achieve dramatic and visually appealing effects. This can only be achieved by subtle blending of colour and texture. The mottled appearance helps camouflage surface imperfections, and allows the old surface to look better for longer.

Flintstone II can be purchased in a range of colours including

*"For all your refinishing supplies, equipment and training needs..."*

**Stone Accents**

Flint-Stone II™ has a depth and richness of texture not found in other multicolour coatings on the market today.

**Beige Accents**

Durable and Long Lasting – NAPCO Flint-Stone II™ adheres to most properly prepared surfaces and has exceptional resistance to most household cleaners.

The bench top system has excellent value, costing much less to apply and maintain than replacing the original surface with a make shift alternative.

It wouldn't be from Napco if it didn't have an innovative dry time. Flintstone II will dry to the touch in 30 to 60 minutes, ready to be coated with clear.
