

"For all your refinishing supplies, equipment and training needs..."

NAPCO's Badger Air Brush

NAPCO's Badger Air Brush is the perfect tool to fix one or even a few chips. Bringing a full spray system into a building for a small job is a major production that inevitably results in overspray - and costs you a lot of clean up time! Stop lugging that heavy spray system around for small repair jobs. The lightweight 1 lb Badger Air Brush is so compact that it fits easily into its own 7-1/2" x 6" box.

Even better yet, the replaceable aerosol can powering the Badger Air Brush is an environmentally friendly choice because the stratospheric ozone depletion potential is zero when using this product.

The easy to use Badger Air Brush is no lightweight, however, when it comes to spraying ability! It sprays with a pattern that is accurate enough to cover an eraser head. Say goodbye to overspray and halos! The Badger Air Brush also gives you less headaches because it does not easily clog or "sputter" like other lower quality air brushes. For small jobs, this convenient sprayer can't be beat.

The Badger Air Brush Kit comes complete with:

- **spray gun with attachable 3/4 oz (22cc) jar**
- **vinyl air hose**
- **propel regulator**
- **6-oz starter propel can**
- **extra 3/4 oz jar with cover**
- **instruction booklet**
