## NAPCO Fish Eye Eliminator

Silicone, grease, fingerprints, silicone caulk residue and other unwanted contaminants product unattractive gaps in the surface of the topcoat that are commonly referred to as "fish eyes". You do a great job cleaning and prepping the fixture, but sometimes you just can't seem to eliminate all of those hard to see contaminants.

NAPCO Fish Eye Eliminator takes care of those hard to spot contaminants, providing you with the smooth and professional look your customers will appreciate. Don't waste time going back the next day to repair your work - do it right the first time with NAPCO Fish Eye Eliminator!

NAPCO Fish Eye Eliminator is compatible with all NAPCO primers and topcoats. Use it and see a visible difference in the quality of your work.
