

*"For all your refinishing supplies, equipment and training needs..."*

## **NAPCO Low Odour Stripper**

We have proudly eliminated the most unpleasant aspect of stripping a bathtub - the noxious odour! It's strong and effective, while providing you with a healthier work environment.

NAPCO Low Odour Stripper bubbles off even the most durable coatings in only 10 to 15 minutes - saving time, money and aggravation. Breathe a little easier - order our Low Odour Stripper for your next job!

NAPCO Low Odour Stripper can be used effectively on porcelain, ceramic, steel, china and glass surfaces.

NAPCO Low Odour stripper must not be used on plastic, acrylic, Formica or fibreglass surfaces, due to the high risk of melting these types of surfaces.

Even though Low Odour Stripper has much less odour than other strippers, proper protection (respirator mask or fresh air breathing system, goggles and heavy duty gloves) must be used when applying this product.
