

"For all your refinishing supplies, equipment and training needs..."

NAPCO Quick Clean Gun Cleaner

NAPCO Quick Clean Gun Cleaner is a must have item for your equipment. Maintaining a clean spray gun is essential for providing the smooth and glossy finish your customers expect.

In the past, cleaning the spray gun was a nasty, labour intensive job. Not any more! NAPCO Quick Clean Gun Cleaner is a super strong solvent that can tackle your hardest to clean spray gun with minimal effort. It's so easy to use - just soak the gun for a couple of hours (virtually no scrubbing required), rinse and go! It quickly and easily melts away even the toughest caked on paint.

The 5 gallon pail comes with a convenient, easy to use dipping basket.

Weaker solvents, such as thinners, can't properly clean a spray gun. NAPCO Quick Clean Gun Cleaner cleans guns faster, better and with less effort than other weaker solvents. It's the spray gun cleaner of choice in NAPCO's own gun repair and maintenance shop.
