

"For all your refinishing supplies, equipment and training needs..."

Napco Extra Strong Etch

This super powerful formula effectively deglosses those harder to etch surfaces, like coloured tubs and tiles, in record time. No more standing around wasting precious time on the jobsite, waiting for your etch to work.

Having worked with products that take up to an hour to do a job half as good, it is a pleasure to offer a product that etches most surfaces in only 5 -10 minutes.

Extra Strong Etch gives you a porous surface that your primer and topcoat can grab onto every time.

The texture is a thick gel, and so unlike runny products, it is easier to control.

NAPCO Etch can be used effectively on porcelain, ceramic, steel, china and glass surfaces.
