

"For all your refinishing supplies, equipment and training needs..."

The FineCoat CS8100 Spray System

FineCoat CS8100 offers the best quality high volume, low pressure (HVLP) spray systems for our industry - giving better transfer efficiency than air spray, airless spray or air assisted airless systems. This reduces coating usage and puts money back into your pocket.

The CS8100 is ideal for medium residential or commercial jobs that involve urethanes, epoxies, finish grade latex, stains, sealers, lacquers, enamel and most multi-color coatings. It consistently gives you the smooth, glossy professional result that your customers expect.

Comes with a Maxum II spray gun with a 1lt-cup, integrated cup holder, 9 metre hi-flex air hose, dual filtration system (the most advanced on the market), easy to clean filters and a patented filter warning system. FineCoat spray systems provide quiet, dependable operation with a patented noise-reduction system and serviceable modular components.

Features:

- 3-stage tangential turbine
- 6-psi capacity
- 18 kg total weight
- 9.1 Meter Hose
- Blocked Filter Warning Light
- Maxum II HVLP Gun with No. 3 Projector Set
- No. 2 & No. 4 Projector sets

If you mostly do baths and smaller resurfacing jobs, you may also be interested in the SoftSpray 2600 Spray System.
