

"For all your refinishing supplies, equipment and training needs..."

The SoftSpray 2600 Spray System

SoftSpray 2600 offers the best quality high volume, low pressure (HVLP) spray systems for our industry - giving better transfer efficiency than air spray, airless spray or air assisted airless systems. This reduces coating usage and puts money back into your pocket.

The SoftSpray 2600 is ideal for small to medium residential or commercial jobs that involve urethanes, epoxies, finish grade latex, stains, sealers, lacquers, enamel and most multi-color coatings. It consistently gives you the smooth, glossy professional result that your customers expect.

It comes with the standard NBC spray gun with a 1lt-cup, integrated cup holder, 6.1 meter hi-flex air hose. SoftSpray 2600 spray systems provide quiet, dependable operation and serviceable modular components.

Features:

- 3-stage tangential turbine
- 6-psi capacity
- 12 kg total weight
- 6.1 Meter Hose
- NBC HVLP Gun with No. 3 Projector Set

If you mostly do bathrooms, kitchens and larger resurfacing jobs, you may also be interested in the FineCoat CS8100 Spray System.
